Pump, valve and pipeline layout for petrochemical high-end market

As China's industrialization process continues to advance, the demand for pumps, valves and pipelines is increasing, and the industry has broad development prospects. Correspondingly, the petrochemical industry is one of the most important application areas for pumps, valves and pipelines, with high profit margins. During the "14th Five-Year Plan" period, Chinese chemical industry will enter a stage of high-quality development. The development of the industry will release a new round of demand for pumps, valves and pipelines. The layout of the petrochemical high-end market is the "main battlefield" for pumps, valves and pipelines companies.

Famous companies gathering Promote high quality development of the industry

The 17th Shanghai International Petrochemical Pump, Valve and Pipeline Fair will be held at the Shanghai New International Expo Center from June 5 to 7, 2025. The 17th Shanghai International Chemical Technology and Equipment Fair and the 17th Shanghai International Chemical Environmental Protection Fair will be held at the same time.
