Excellent exhibitions have the power to change the world

—Gu Xiulian, Vice Chairman of the Standing Committee of the Tenth National People's Congress and Director of the China Working Committee on the Care of the Next Generation, and other leaders encouraged the Chemical Equipment Exhibition to become bigger and stronger!

Exhibitions have become a necessary platform for corporate development

Gu Xiulian (third from left), Vice Chairperson of the 10th National People's Congress Standing Committee and Director of the China Working Committee on Aging, visited the exhibition accompanied by Zhang Xueshan (fifth from left), Chairman of Zhenwei International Exhibition Group.

INDUSTRY LEADERSHIP SUCCESSFULLY CONCLUDED

From November 19th to 21st, the annual international chemical equipment conference - the 16th Shanghai International Chemical Equipment Fair (CTEF2024) came to a successful conclusion under the focus of the industry. More than 1,000 brand companies in the global "chemical equipment circle" and more than 100,000 professional visitors from home and abroad attended the conference to jointly create a one-stop annual supply and procurement event for the "chemical equipment circle". The 16th Shanghai International Chemical Environmental Protection Exhibition and the 16th Shanghai International Pump, Valve and Pipeline Expo were held at the same time.

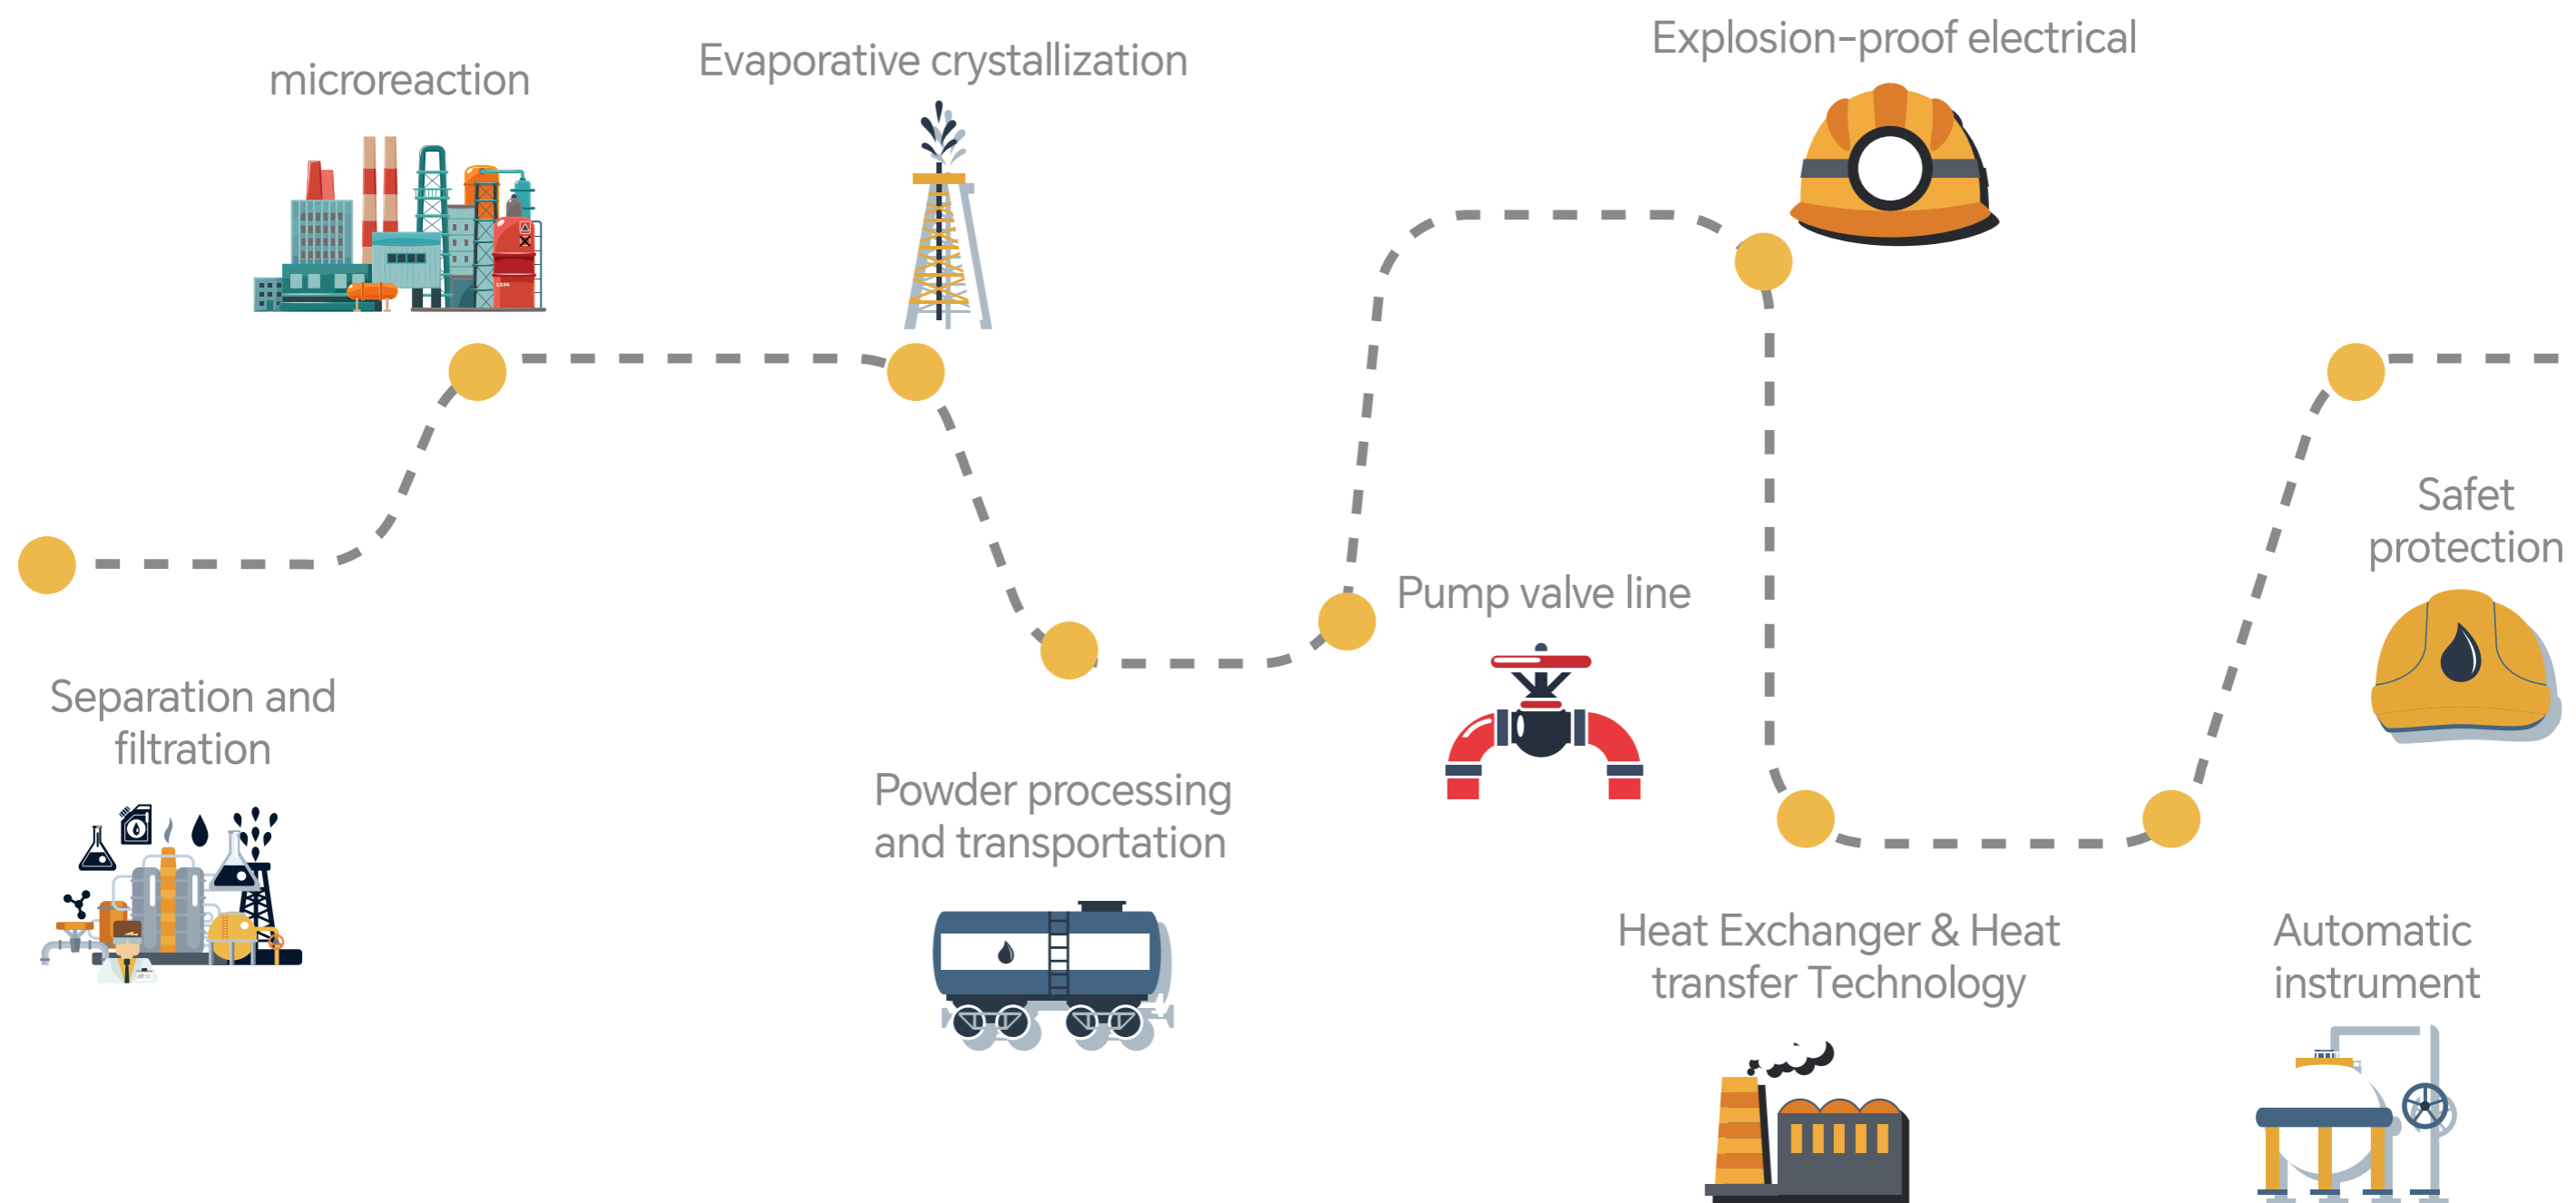

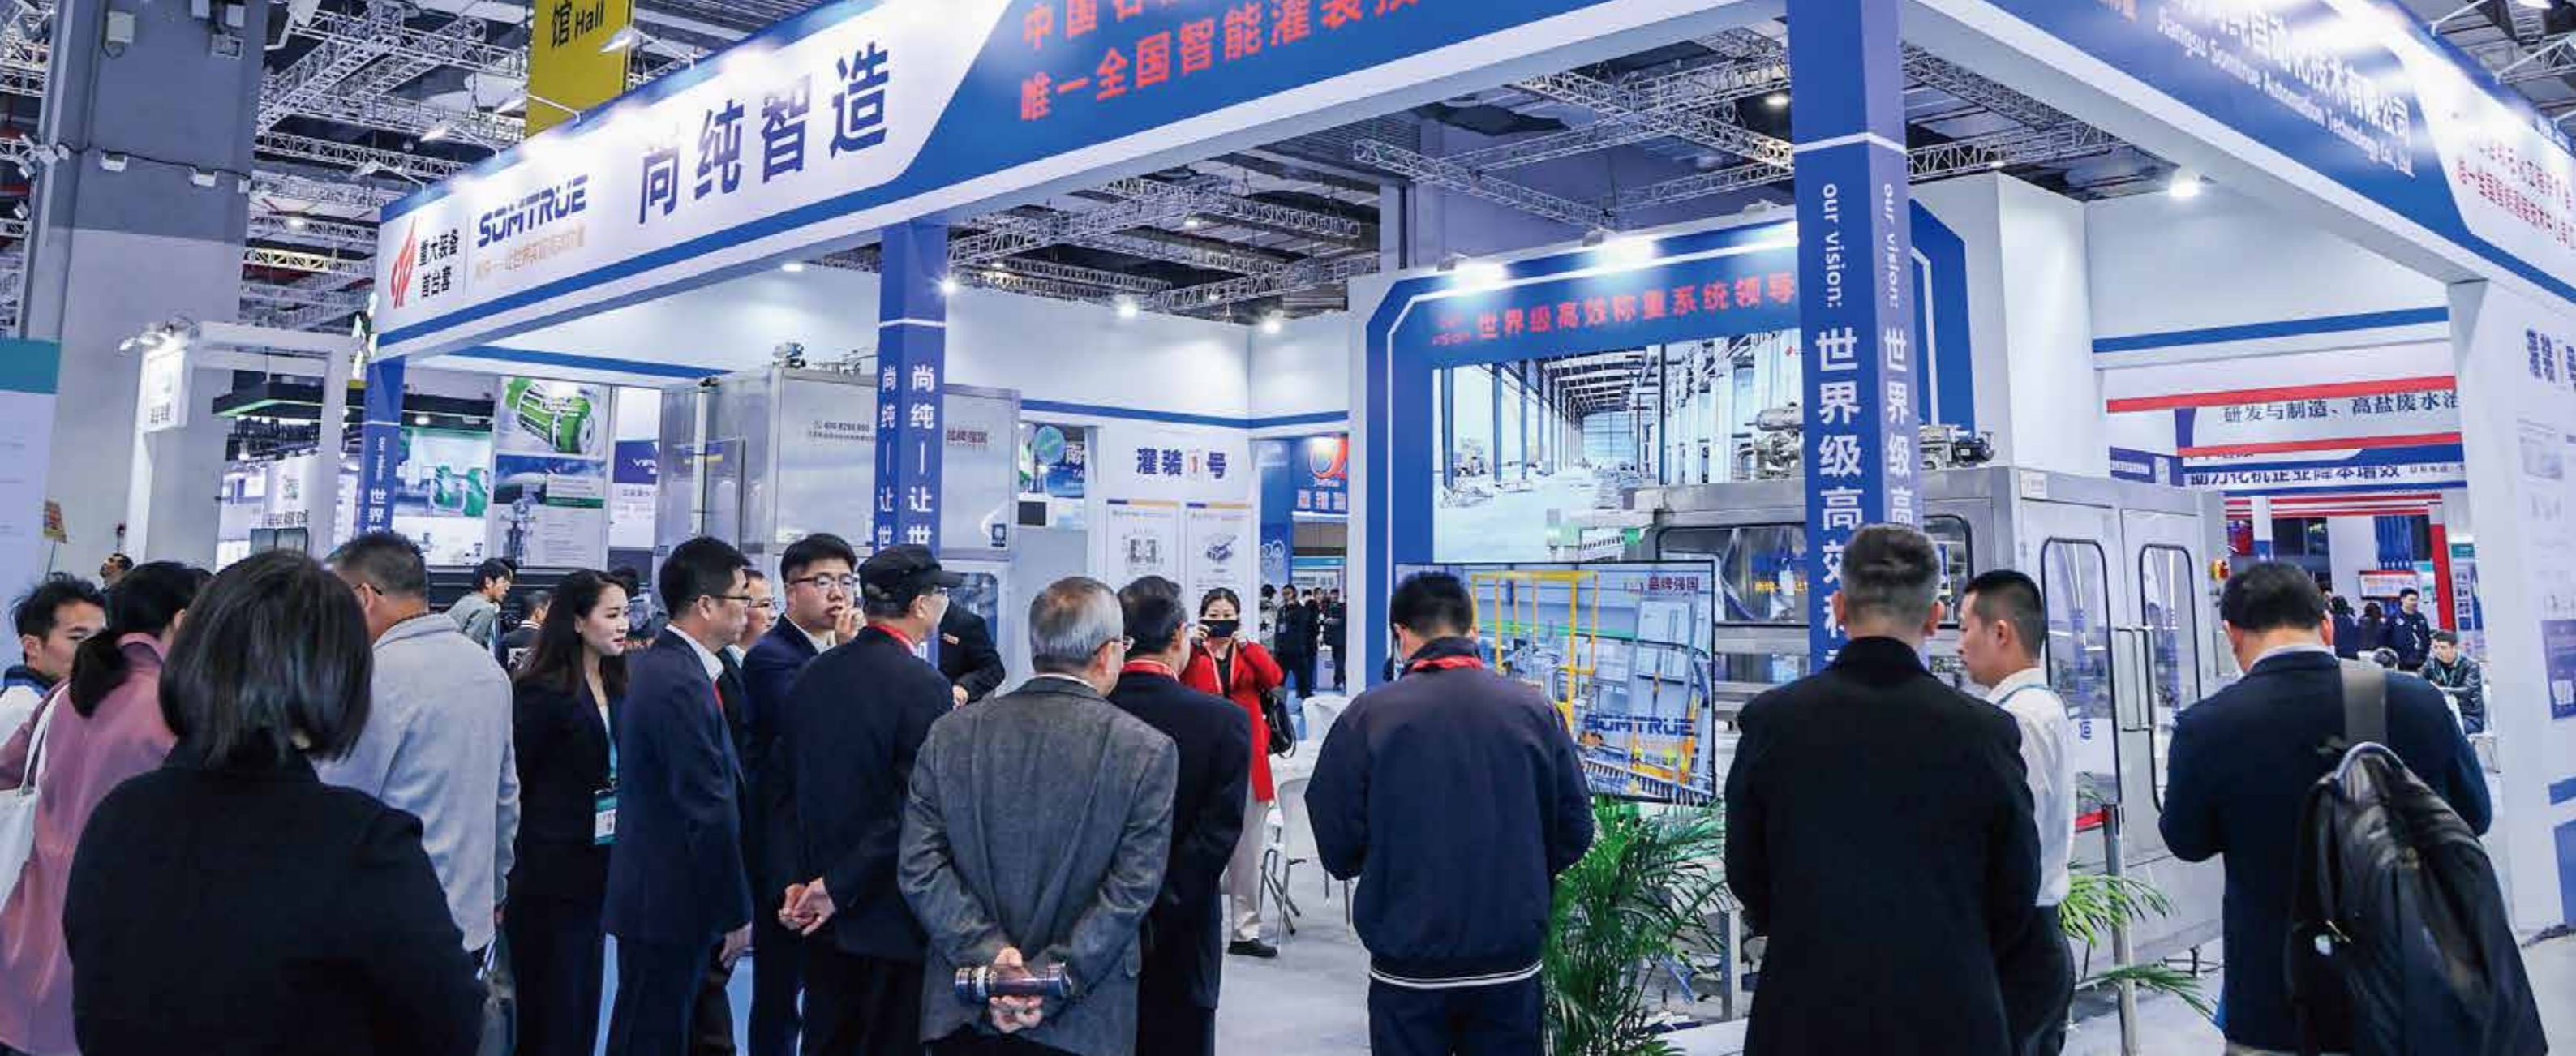

The exhibits cover complete sets of chemical equipment, powder equipment, conveying equipment, separation and filtration, evaporation and crystallization, drying equipment, microreactors, industrial refrigeration, heat exchangers, instrumentation and automation, storage and transportation packaging and pressure vessels, safety and explosion protection, wastewater treatment, waste gas treatment, solid waste treatment, pumps and vacuum equipment, valves, seals, fans, compressors, new chemical materials and other technologies and products in the entire industrial chain of chemical equipment.

CTEF focuses on the entire industrial chain of chemical equipment

6 exhibition areas + 9 product sectors build new quality productivity in the chemical equipment industry

CTEF2024 focuses on the entire industrial chain of chemical equipment, focusing on the display of 9 major industrial sectors including separation and filtration, heat treatment, micro-reaction, evaporation and crystallization, powder processing and transportation, pumps, valves and pipelines, explosion-proof electrical, automation instruments and meters, and safety protection, to build a high-quality and efficient docking platform for technical exchanges and trade cooperation in the chemical equipment industry.

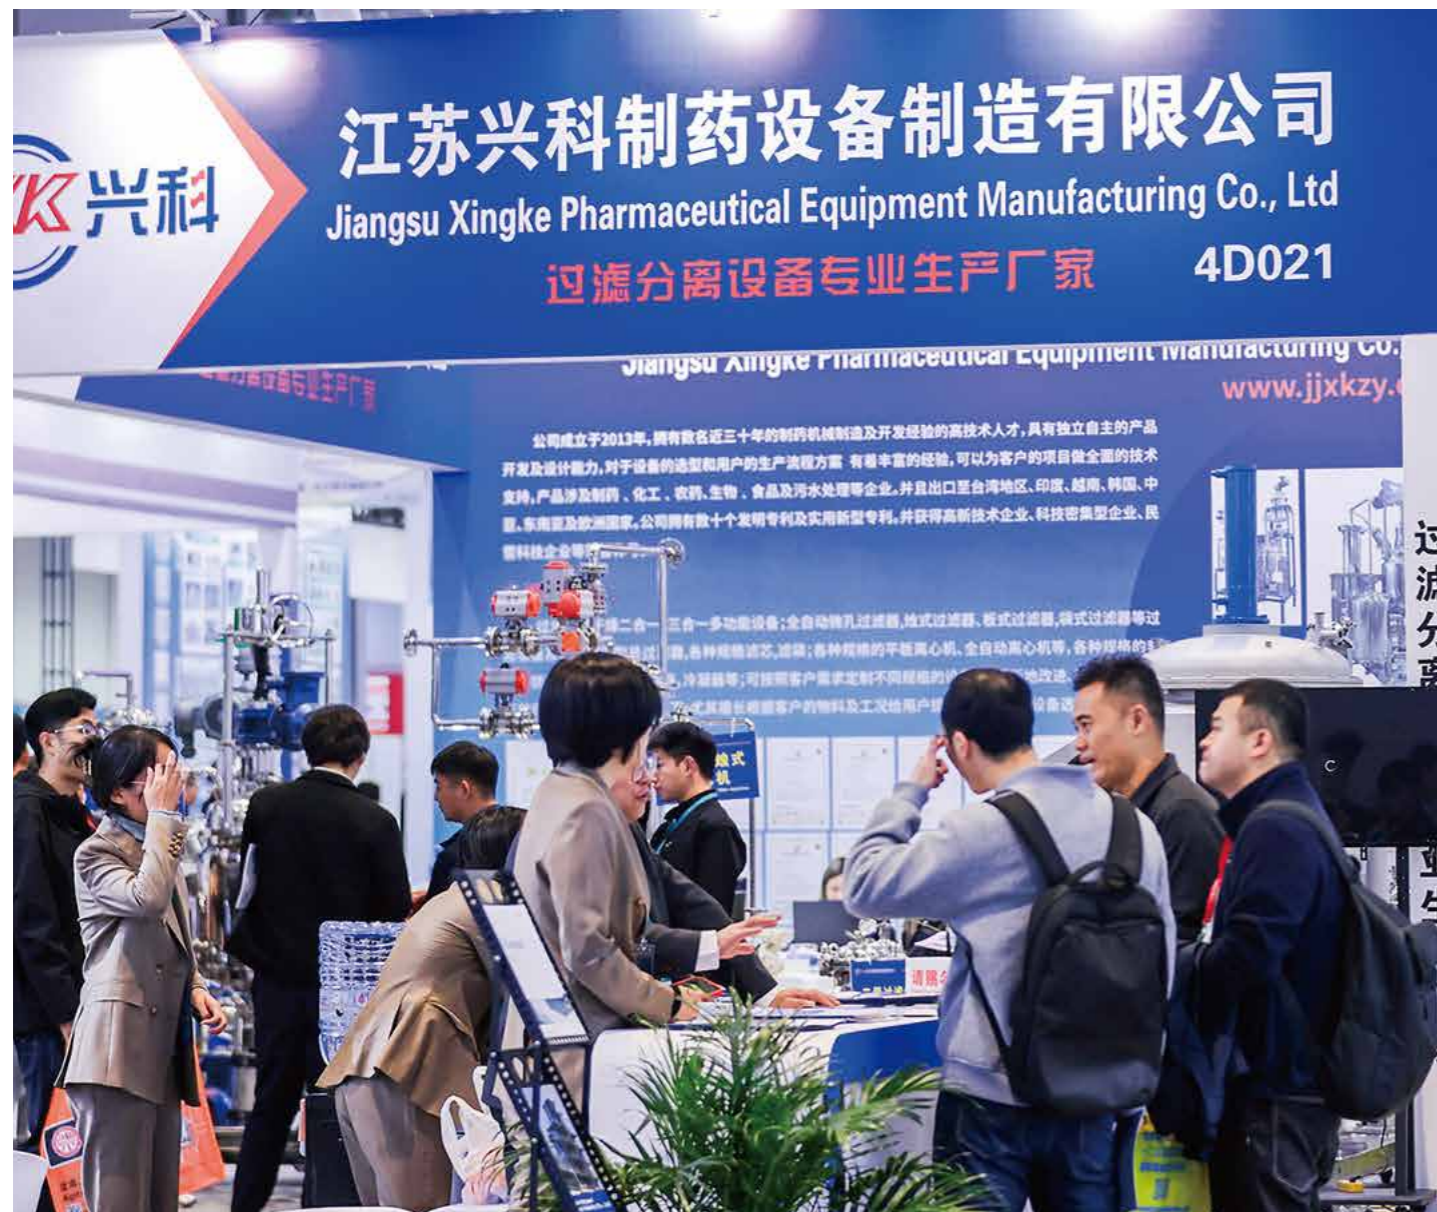

**FAMOUS EXHIBITORS
GATHER TOGETHER**

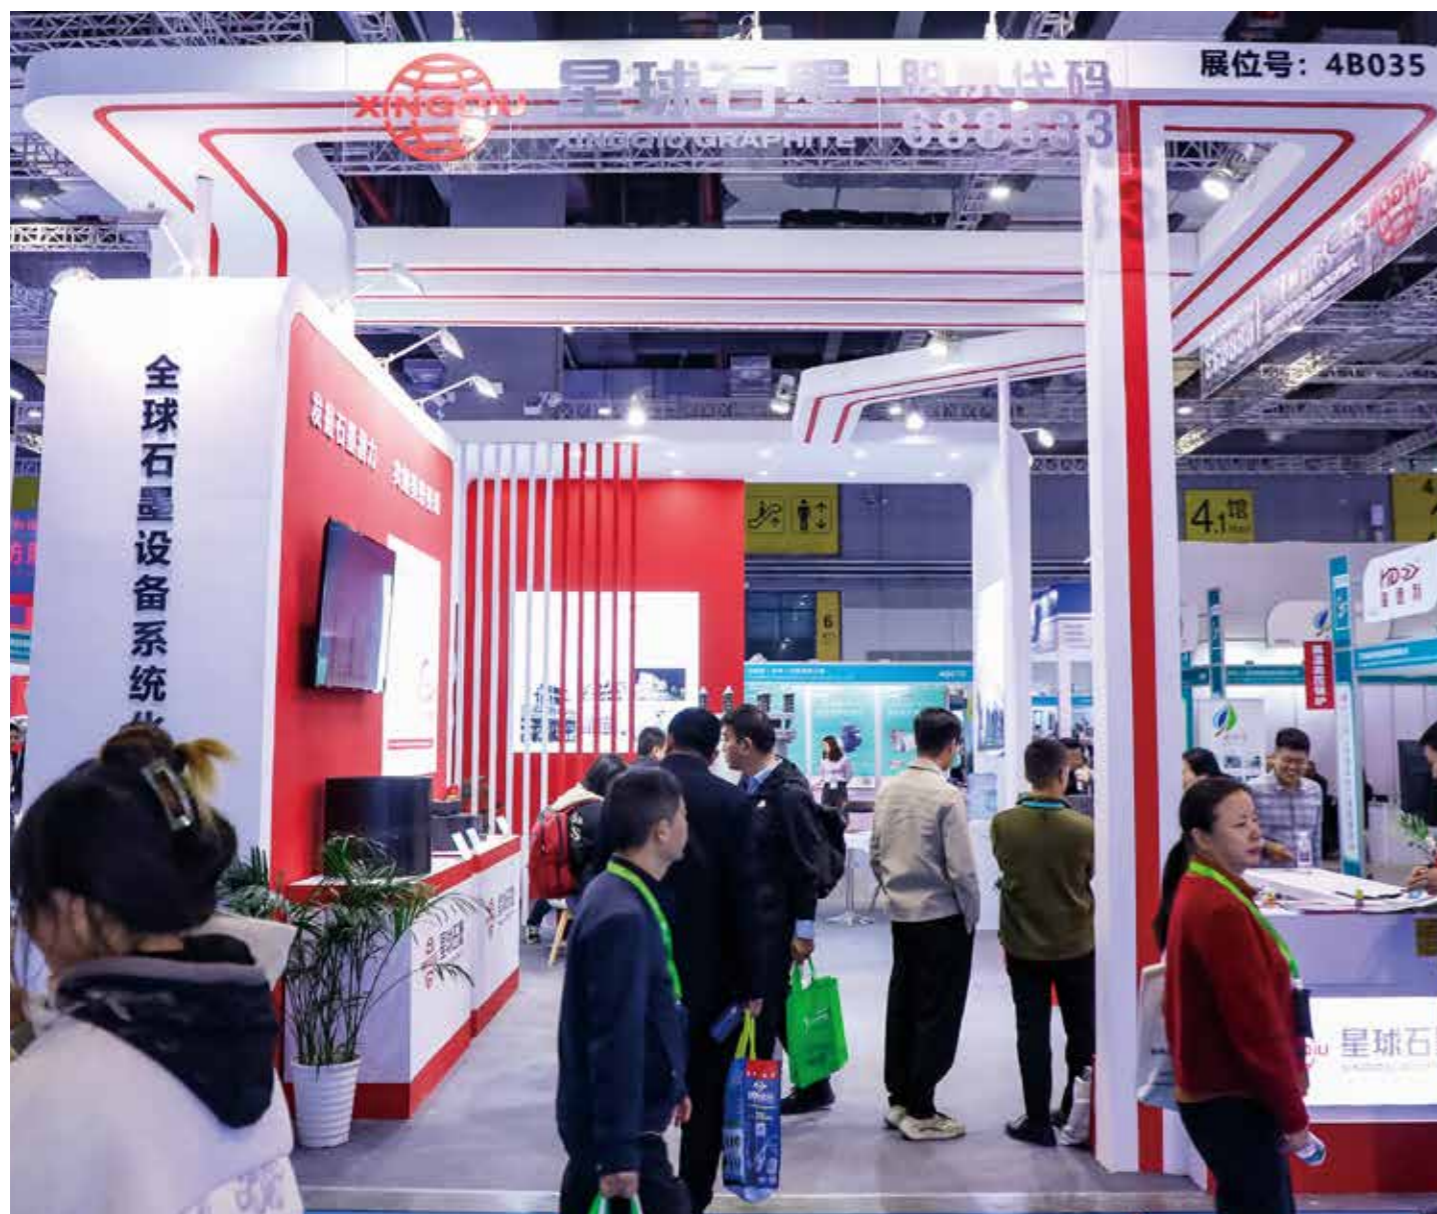

Pharmaceutical industry has strong demand, separation and filtration contain new opportunities

Under the background of national policy support, domestic separation and filtration enterprises with core technology and R&D advantages will gradually occupy a larger market share by relying on product technology advantages and localization advantages. The exhibition scale of this exhibition hit a record high, and the participating enterprises covered key fields of separation and filtration, including Shanghai Centrifugal Machinery Research Institute, Haishen Electromechanical, Jiangsu Saideli, Jiangsu Huada, Chongqing Jiangbei Machinery, Xiangtan Huibo Centrifuge, Shanghai Shengyang, Qingdao Lele, Nanjing CSSC Oasis, Xinzhongda Centrifuge, Mudan Centrifuge, Zhangjiagang Huaxiang Centrifuge, Yixing Huading Machinery, Suzhou Kangjie, Zhejiang Huaheng, Zhejiang Ferth, Shanghai Dazhang, Yingxiang Filtration, Hangzhou Tianshan, Dongou Filtration, Shandong Tianwei Membrane, Shanghai Jingfa, Shanghai Shuangqi, Jiangsu Blue Sky Environmental Protection, Shanghai Cijie Environmental Protection, Juneng Machinery, Shanghai Vichi Filtration, Zhejiang Meide Filtration and hundreds of other leading enterprises.

Energy conservation and emission reduction drive innovation Refrigeration and heat exchange field becomes a policy focus

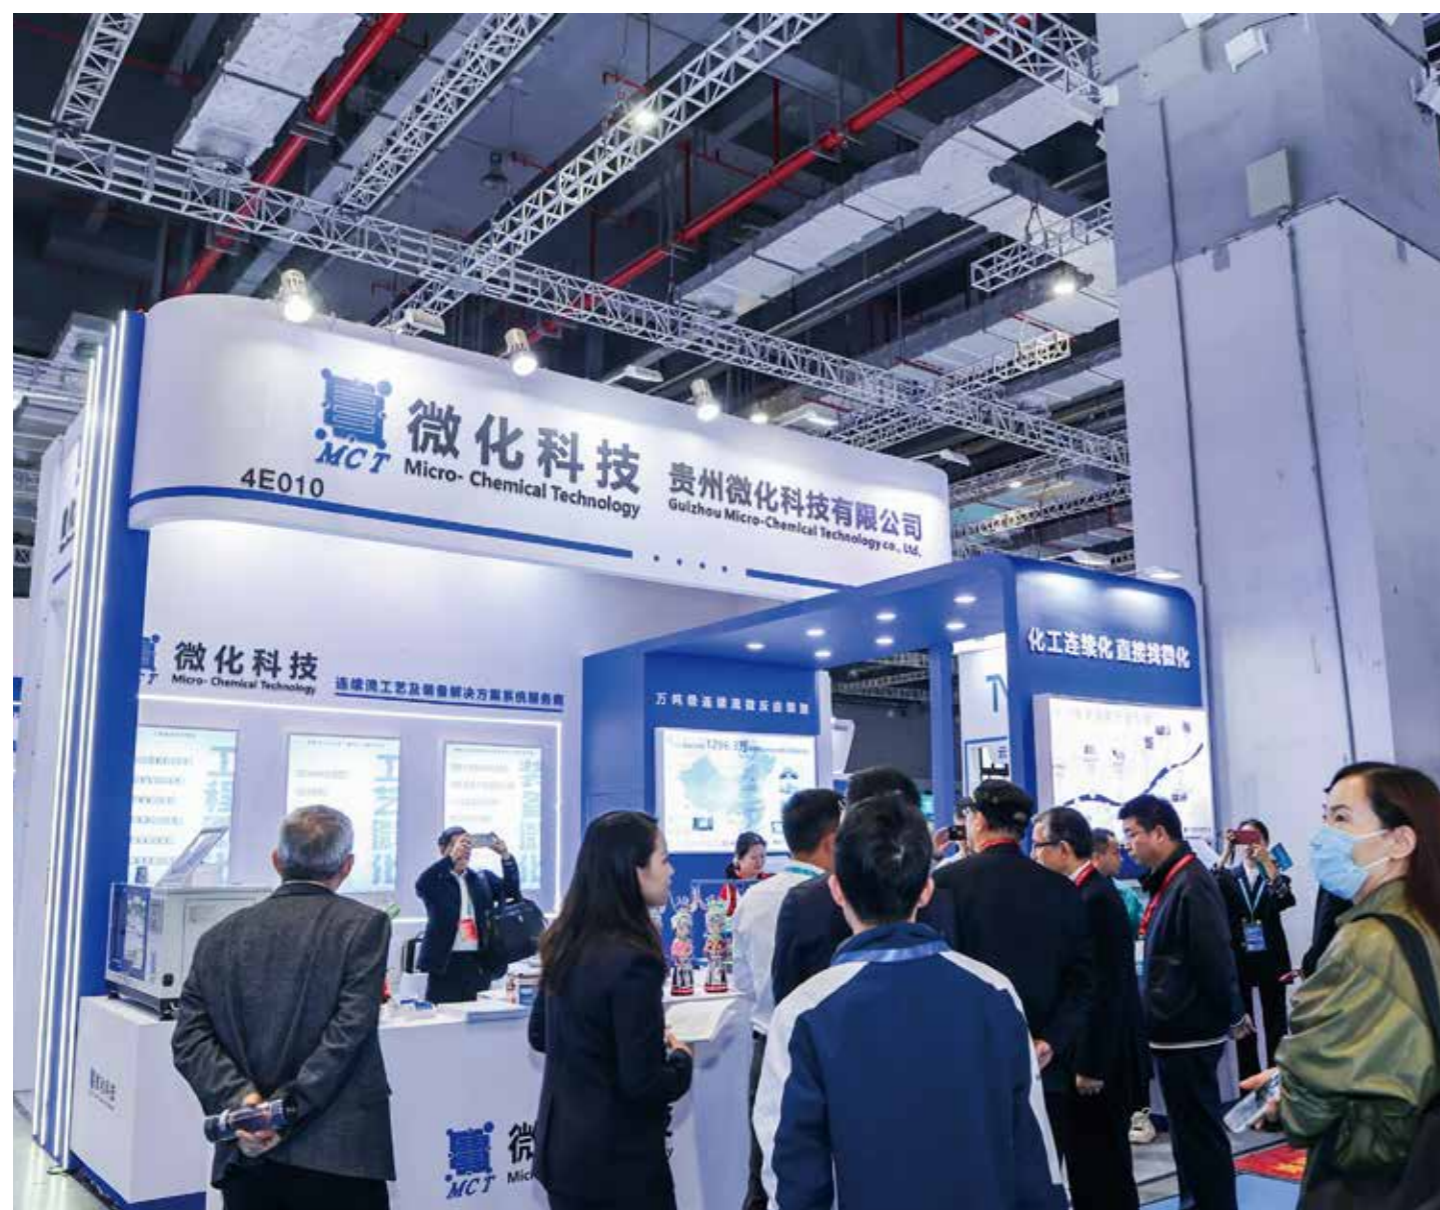

In the "14th Five-Year Plan for Heat Treatment", the Chinese government attaches great importance to the heat treatment industry. The government actively promotes technological innovation and standardization in the heat treatment industry, and encourages enterprises to conduct heat treatment technology research and equipment upgrades. In 2024, the exhibition attracted HTRI, NEC, SWEP, Aode Machinery, Jiangsu Gaide, Jieti Chemical, Shanghai Banhuan, Snowman Co., Ltd., Qingfeng Environment, Longhua Technology, Juneng Machinery, Shandong Boyu, Shandong Huaxin, Xinshun Shengda, Nanjing Plant, Kude Refrigeration, Gansu Lanke Petrochemical, Carliref, Inlovison, Boyster, Yantai Henghui, Hangzhou Shenshi, Guangdong Jema, Shandong Hongji, Shandong Meiguang, Shandong Jinde, Jiangsu Baode, Shanghai Putek, Shanghai Mofu, Shanghai Nolen, Shanghai Yicheng (and other updates) and other companies to actively participate in the exhibition and bring the latest technologies and products to the exhibition.

Micro-chemical industry has become an important direction for innovation and development

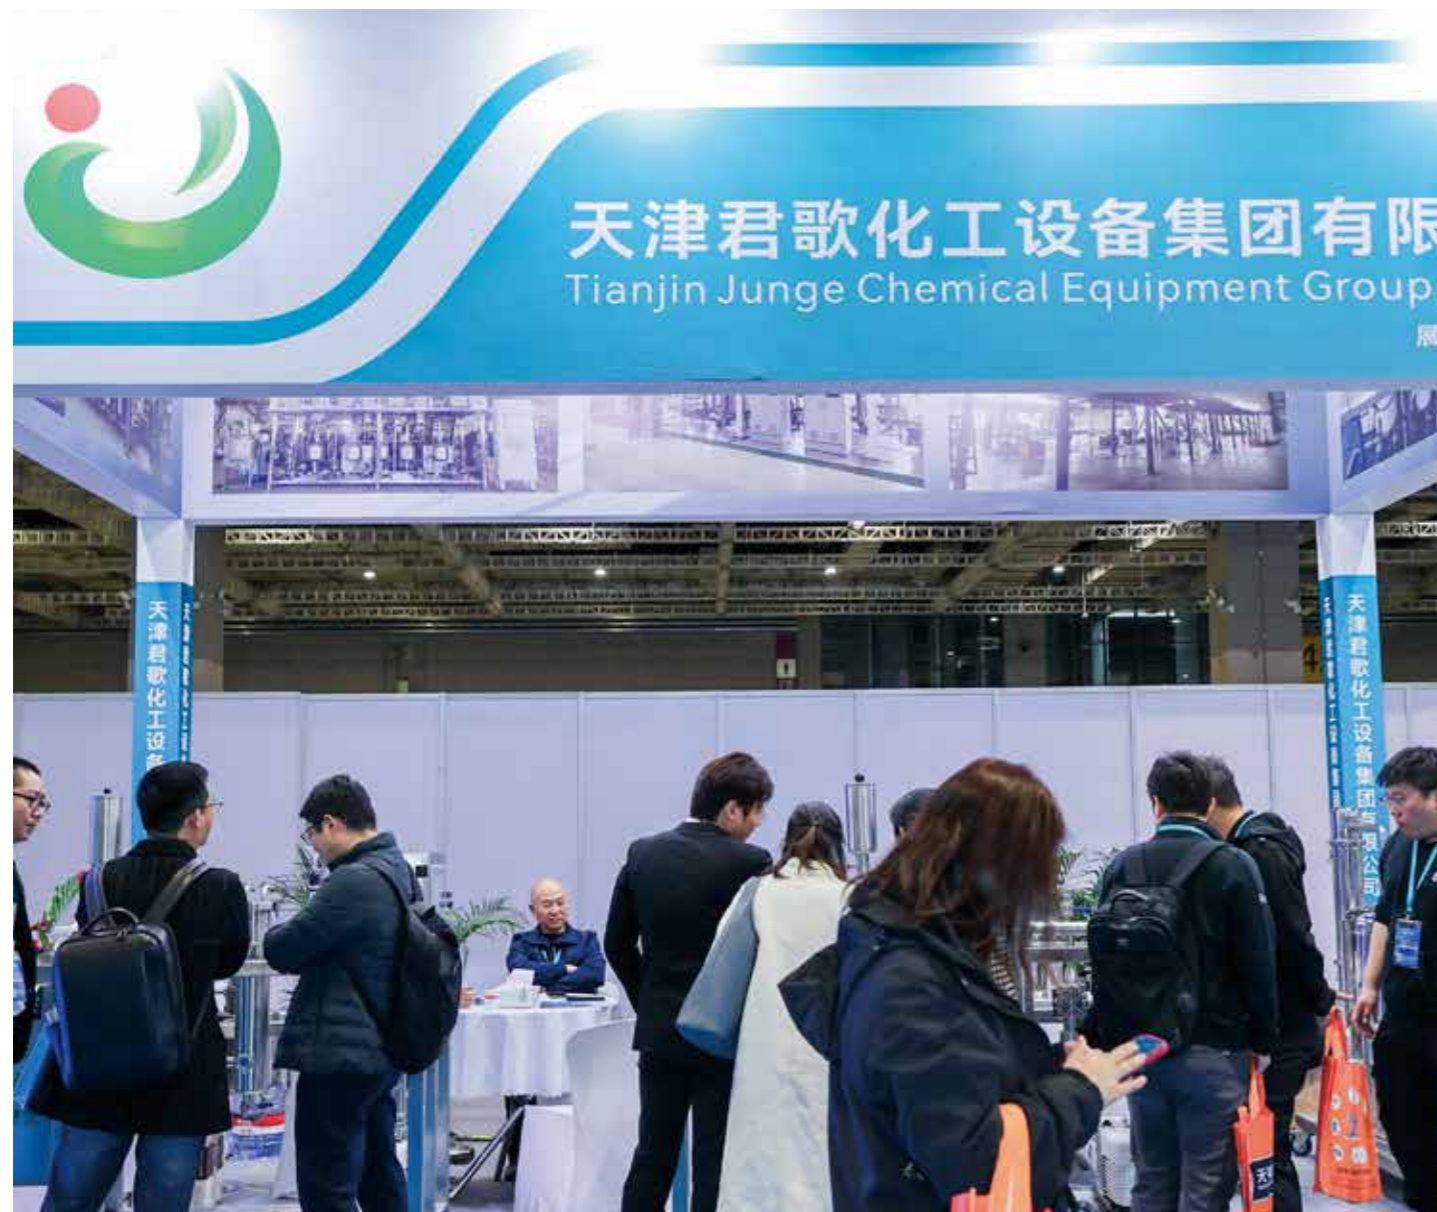

It will help build a new quality productivity of chemical equipment

In recent years, micro-reaction technology has not only achieved many remarkable research results, but also played an increasingly important role in the synthesis of medicines, pesticides, special materials, fine chemical products and intermediates. At this exhibition, Guizhou Micro-Chemical, Taizhou Pudu, Oushisheng, Shenzhen Yizheng, Hangzhou Shenshi, Zhongshan Zhian, Feili Chemical, Xi'an Weite, Kunshan Weiyi, Jinde New Materials and other companies made strong appearances.

The evaporation and crystallization industry is developing rapidly and the environmental protection industry system is gradually improving.

The treatment process of organic high-salt wastewater is complex, and the resource utilization and zero-emission goals are heavy and demanding. Under the general trend of the country's vigorous promotion of energy conservation and environmental protection, the national industrial policy encourages the evaporation and crystallization equipment industry to develop in the direction of high-tech products. This exhibition invited evaporation and crystallization, which are important technical units for high-salt wastewater treatment and key technologies for waste resource utilization and reduction. Shenzhen Ruishenghua, Shenzhen Jiejing, Lanwang Energy Saving, Wenzhou Jinbang, Wenxiong Holdings, Hebei Yunhao Technology, Hebei Leheng, Shanghai Shennong, Blue Origin, Weihai Runlan, Shanghai Zhongteng Environmental Protection, Jiangsu Myande, Jiangsu Leke, Jiangsu Zongheng, Jiangsu Grant, Nanjing Gaojie, Liyang Dewei Turbine, Shanghai Lanbin Petrochemical, Suzhou Qiaofa, Zhengzhou Boda, Qingdao Kangjinghui, Changsha Jinzhao, Anhui Jinlong, Suzhou Xitu Environmental Protection, Suzhou Longfeng, Wuxi Unate, Wuxi Kemik, Changzhou Yanjialong, Shandong Hengyuan and other companies made a wonderful appearance

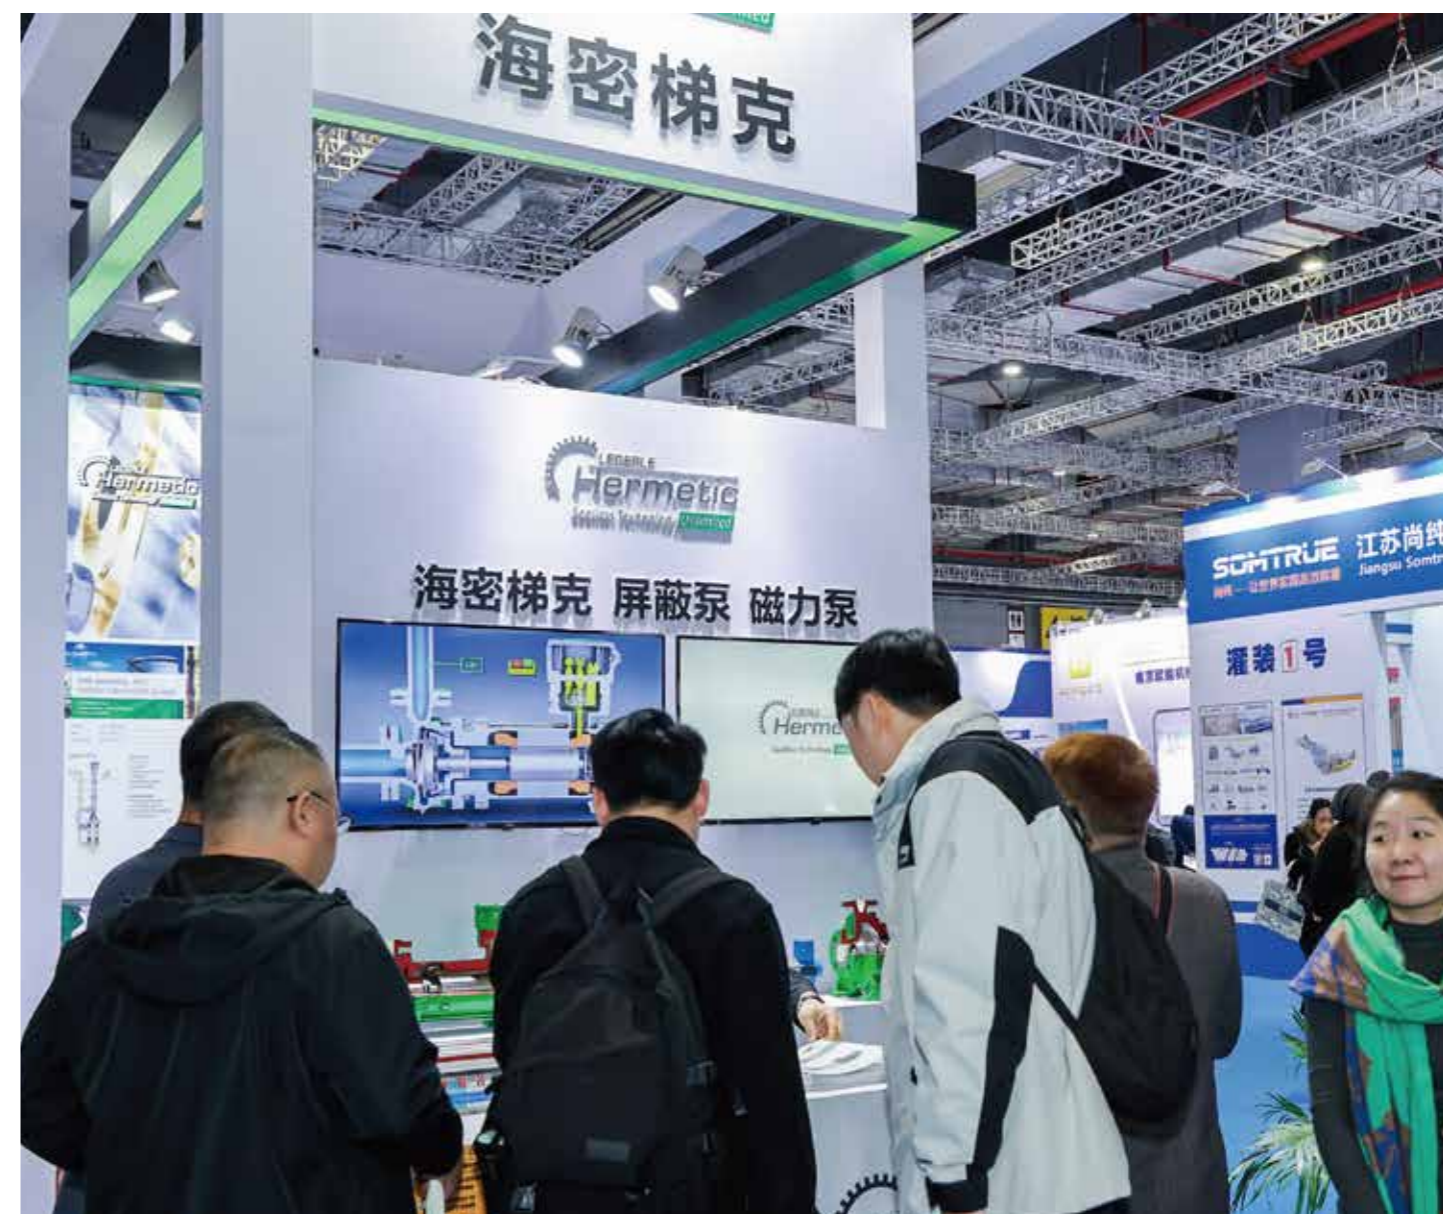

High-quality powder explosion-proof equipment is emerging to protect national chemical production

In recent years, national support policies have been continuously introduced, guiding the development of powder processing and transportation towards innovation. The organizing committee invited Weizer, Aike Sheng, Stifu, Shanghai Saishan, Shanghai Ruang, Shanghai Donghua, and Shanghai Keli Rick, Shanghai Zhuwei, Jiangsu Daojin, Jiangsu Miyou, Jiangyin Yuchen, Jiangyin Wanda, Jiangyin Gaohong, Jiangyin Zhongkai Pharmaceutical, Jiangyin Xin'an Powder, Shijiazhuang Rijia, Guangzhou Taisheng, Tianjin Shida, Xinxiang Zhenying, Manufacturers such as Zibo Yinqi, Changzhou Zhongshi Sanshui, Wuxi Yibot, Jiangsu Jiayu, Shandong Haide, Shengzhou Sanwei, Shanghai Beiyongbei, Dalian Zhaohe, Weldon, and Beibi Safety participated in the exhibition to promote the transformation and upgrading of manufacturers.◦

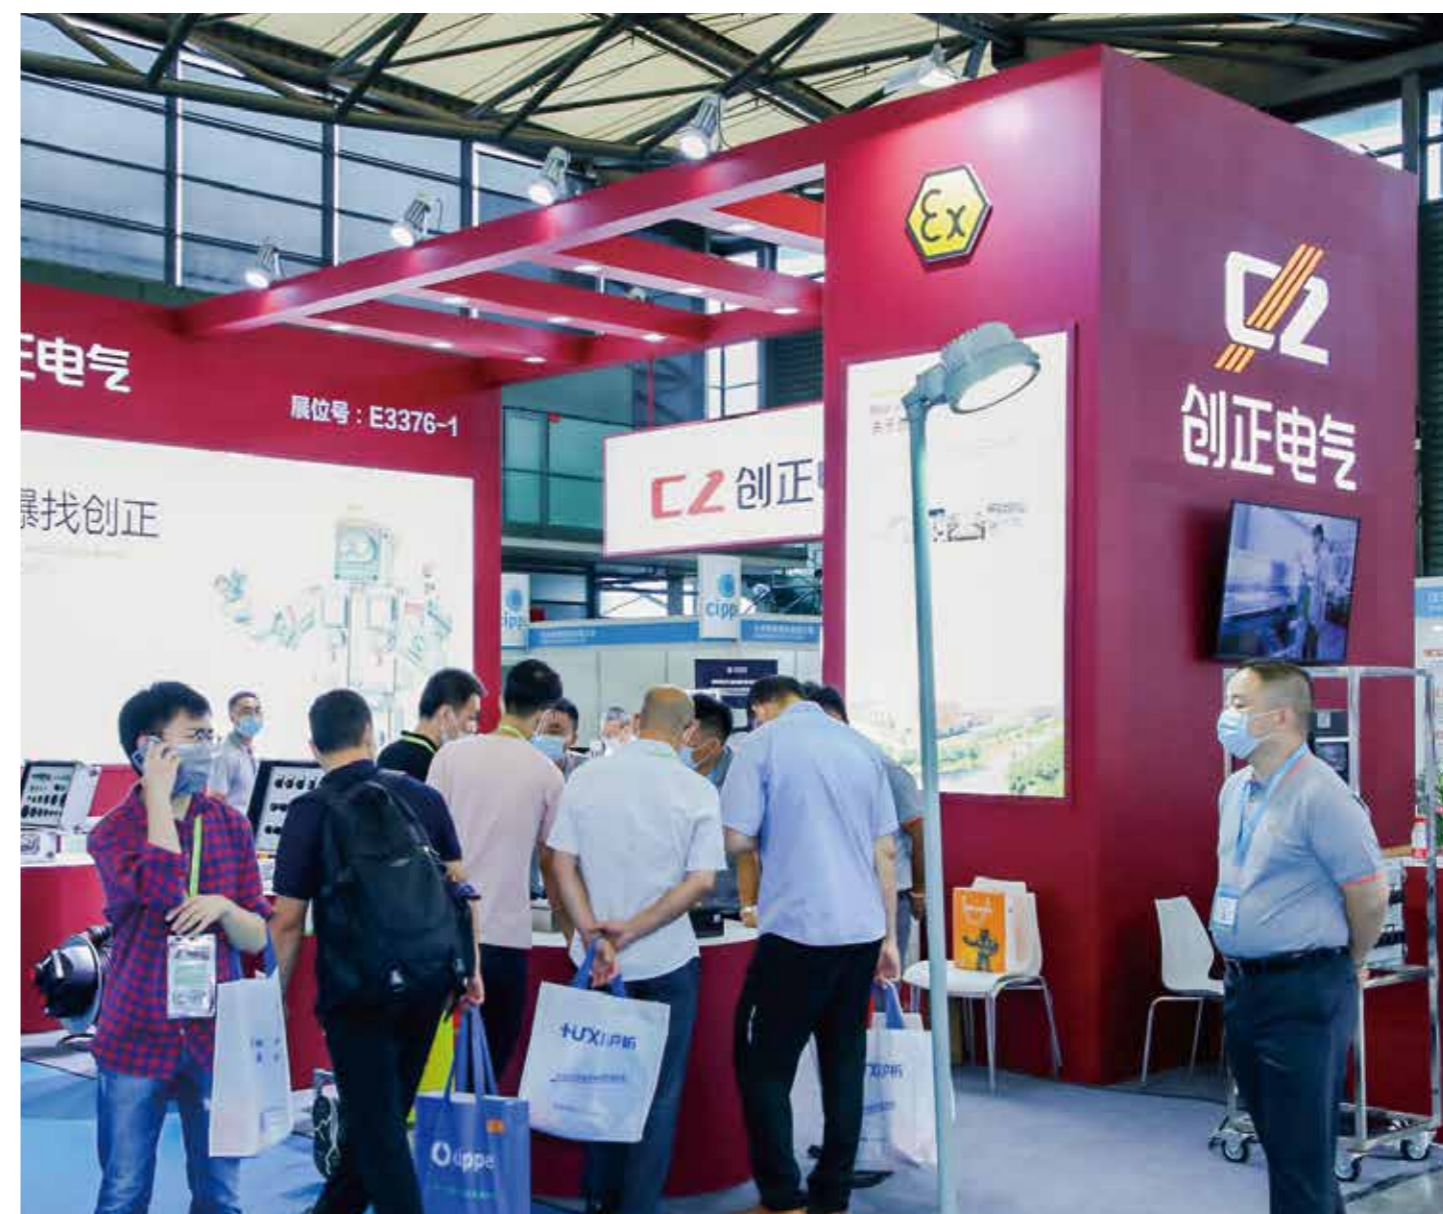

Seizing the high value-added petrochemical market, pumps, valves and pipelines are welcoming new momentum for development

Under the national strategic goal of "dual carbon", the industry's industrial structure needs to accelerate transformation, and the carbon neutrality goal has also posed huge challenges to the transformation and innovation of the pump, valve and pipeline industry. German Hermetic, Dalian Empire Shielded Electric Pump, Hangzhou Alkali Pump, KSB, Hefei Xinhua Shielded Pump, Depam (Hangzhou) Pump, Hamida Valve, Runjiao Valve, Taiya Valve, Yuanda Valve, Zhipeng Valve, Bethel, Lixin Valve, Jiangsu Huaying, Lianggong Valve, Newton Fluid, Jinfeng Fluid, Owek, Cameron, Xinou Intelligent, Baiqiang Valve, Tanggong Valve, Lianggong Valve, Xiangsong Valve, Keyu Valve, Lianke Valve, Ruisituo Valve, Youfumi, Teyi Valve, Xintai Valve, Wanshitong Valve, Zhejiang Woding, Longan Flange, Yonglian Valve, Zhipeng Automatic Control Valve, Zhitong Pipe Valve, Zhitai Technology, Zhongwu Stainless Steel, Zhejiang Lidi, Zhejiang Bosheng, Zhejiang Baofeng, Zhejiang Huaming, Longda Steel, Zhejiang Xinrui Special Steel, Shanghai Kester, Guangdong Shuangxing, Baoti, Baoji Juxinyuan, Jiangsu Shunchi, Qingshan Steel Pipe, Baoji Jucheng and other companies appeared at the exhibition to display new products and technologies.

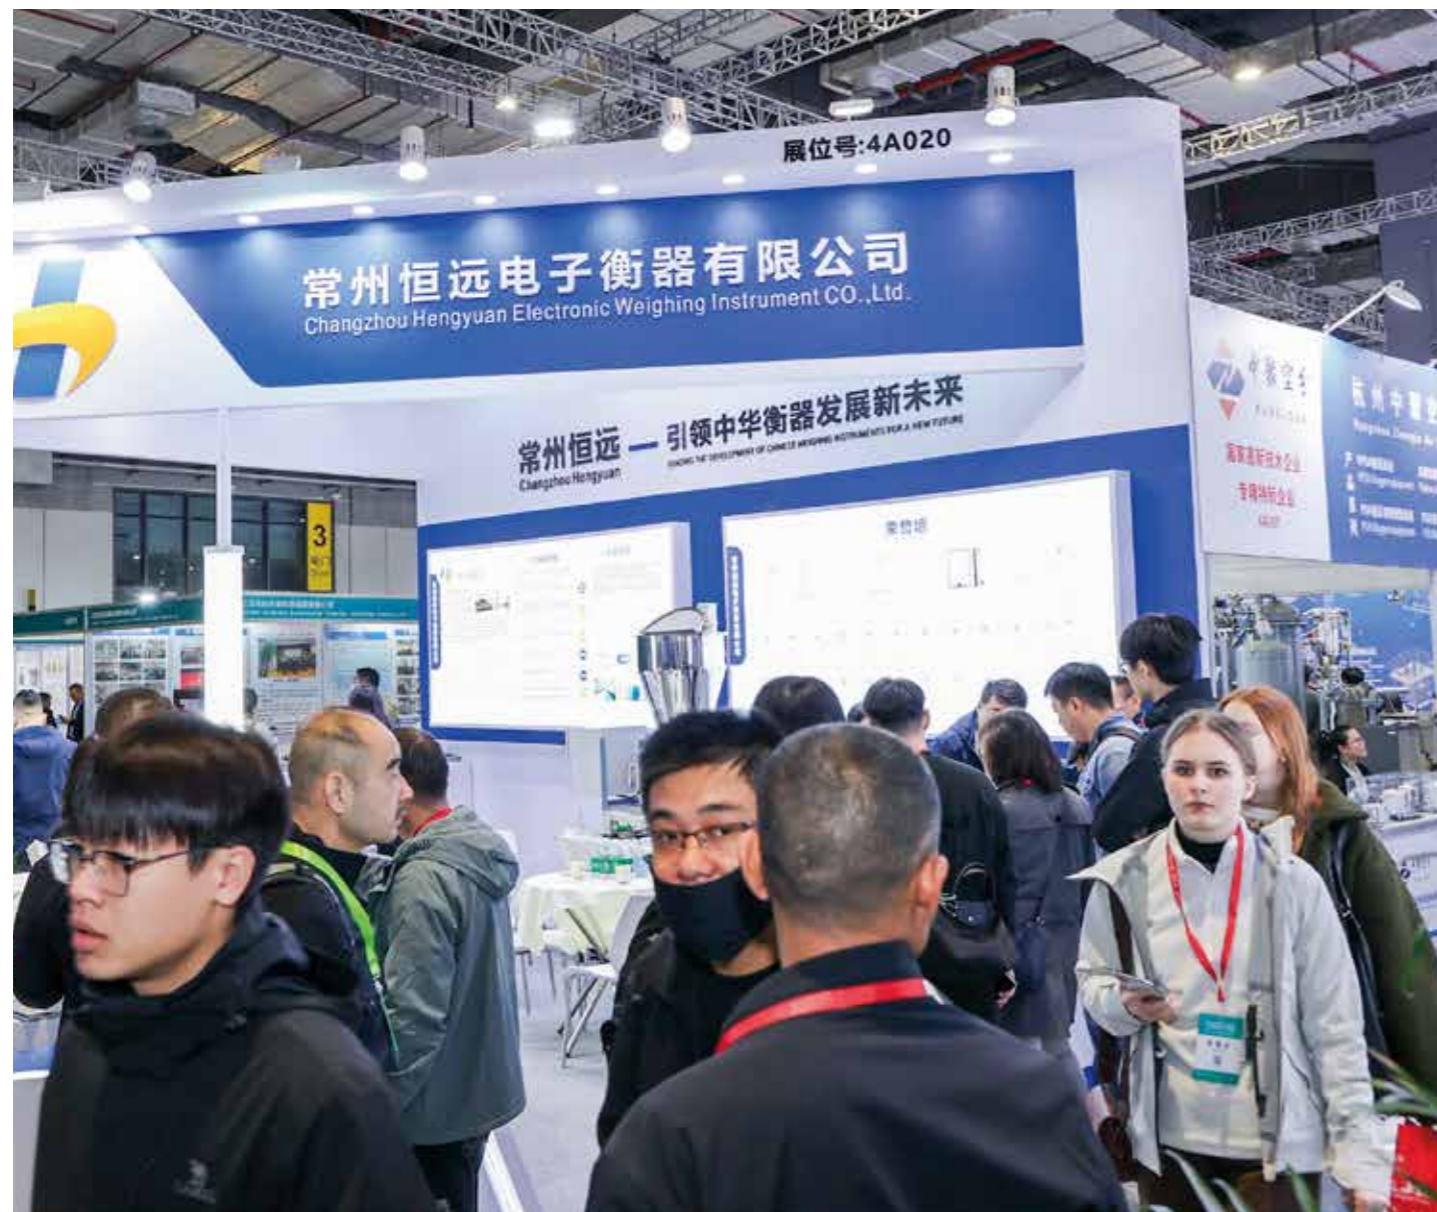

Policies increase safety in production Explosion-proof equipment has become an important part of production that cannot be ignored”

According to a series of policy documents such as the "Guiding Opinions on Accelerating the Development of the Explosion-proof Electrical Appliance Industry" and the "14th Five-Year Plan" for the explosion-proof electrical appliance industry, the country proposes to strengthen infrastructure construction to enhance independent innovation capabilities in order to cultivate and form An industry brand with huge influence. Actively responding to the national call, this exhibition invites GE, Honeywell, Schneider, Phoenix, BARTEC, Delixi, German Cologne, Huarui Keliheng, Geexiang Dräger, Roxek, Nanyang Explosion-proof, Dongfang Electric Heating , Huarong Group, Chuangzheng Explosion-proof, Shandong Silverstone, Hengtong Electrical Instruments, Feice Explosion-proof, Intergold, Tianjin Longdian Electric, Shenyang Northern, Zhongxing Explosion-proof, Jinyi Optoelectronics, Ningbo Langke, Shanghai Juege Electric, Shanghai Bo Chemicals, Qisheng Electric, Feipu Explosion-proof, Mingmai Explosion-proof, Wenzhou Haorong and other companies participated in the exhibition.

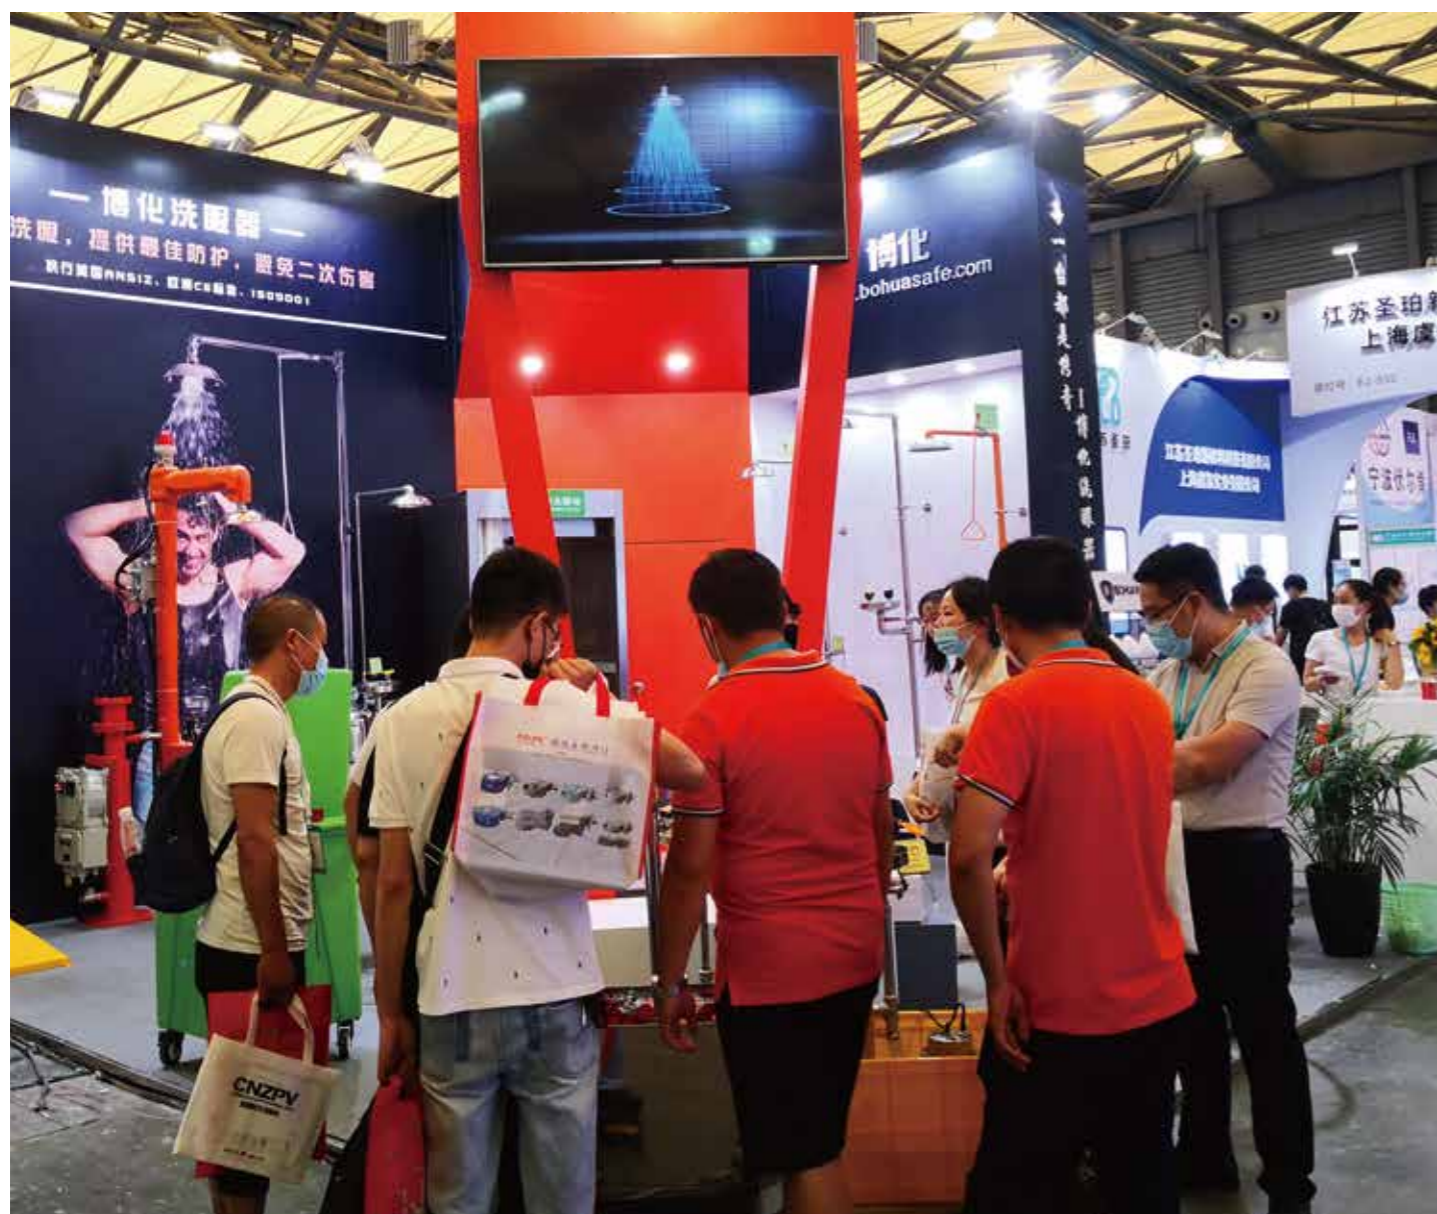

Famous instrument and meter companies gather together to transform the chemical industry into high-end

In February 2023, Xi Jinping, General Secretary of the CPC Central Committee, delivered an important speech, emphasizing that "we must fight a tough battle to localize scientific and technological instruments and equipment, operating systems and basic software". The major scientific instrument concept stocks rose at that time, and domestic instruments received unprecedented attention. Siemens, Weidmuller, Phoenix, Emerson, Beckhoff, ABB, Omron, Mitsubishi, Hitachi, Honeywell, Zhejiang Zhongkong, Zhejiang Lindu, Kaobo Electromechanical, Delixi, Chongqing Chuanyi, Shenzhen Maxun, Huichuan, Wuzhong Instrument, Shanghai Chenzhu Instrument, Shanghai Enbang Automation Instrument Co., Ltd., Shanghai Keyou Petroleum Instrument/Mike Sensor, InSCO Sensor Instrument, Cao Luoyinsi, Suzhou Lanhua Instrument promote the industry to develop towards high-end.

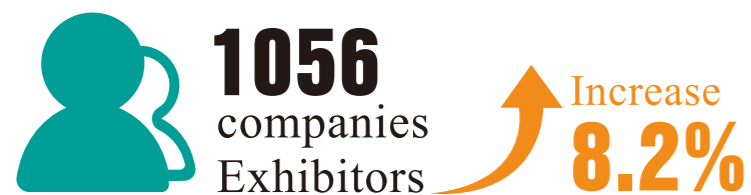

Chemical safety protection Provide special rectification methodology

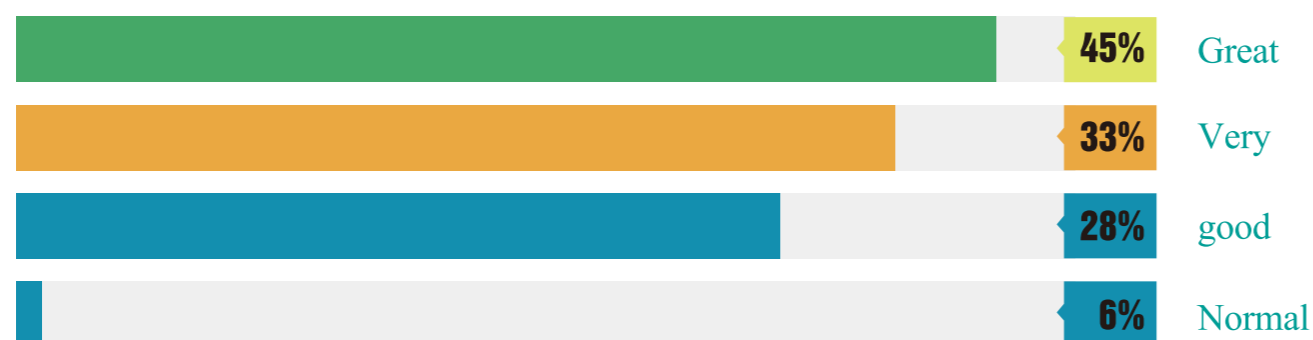

The 14th Five-Year Plan proposes to strengthen the safety and emergency industry and optimize the industrial structure. With the market as the guide and enterprises as the main body, we will deepen the integration of science, education, production and education in emergency management and promote the development of the safety and emergency industry to the middle and high end. Dräger Safety Equipment, MESIA, Tyco Security, Lakeland, Delta, Shanghai Bohua, Shanghai Butian, Safety Protection, Runwanda, Vittier Fire Protection, Shanghai Fangzhan Fire Protection, Shanghai Huantuo, Xuzhou Bafang and other companies appeared together to discuss and provide a special rectification methodology for safety protection.

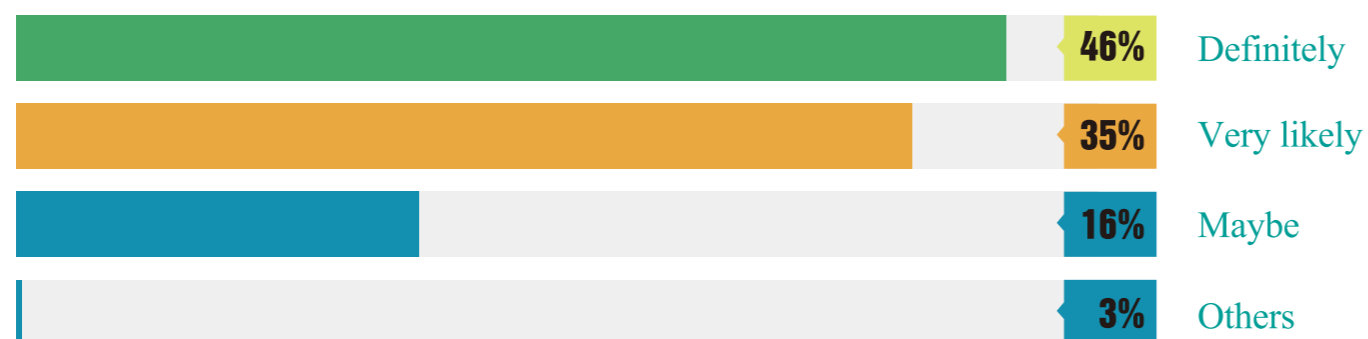

Detailed Exhibitor Data

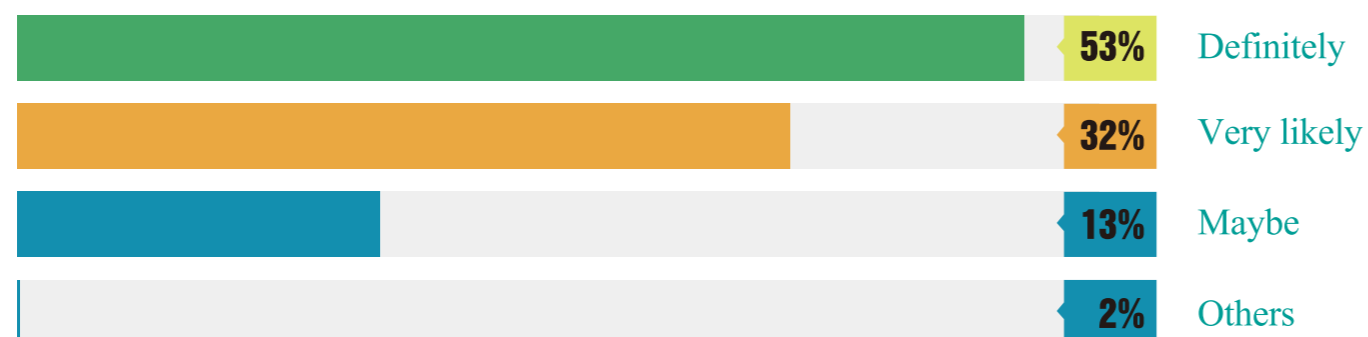

Exhibitors' satisfaction with this exhibition

Exhibitors' willingness to participate in the next exhibition

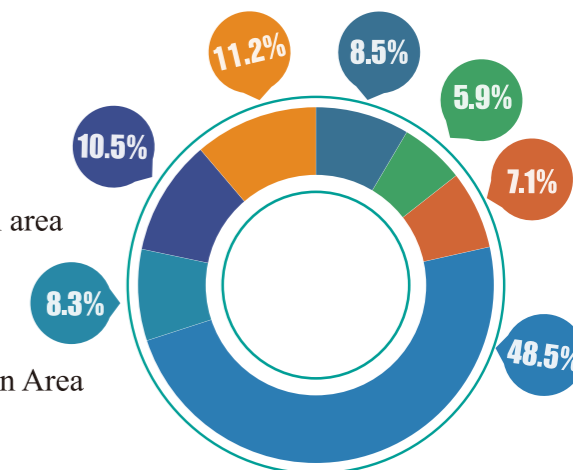

Probability of recommending counterparts to participate

Exhibitor display area ratio

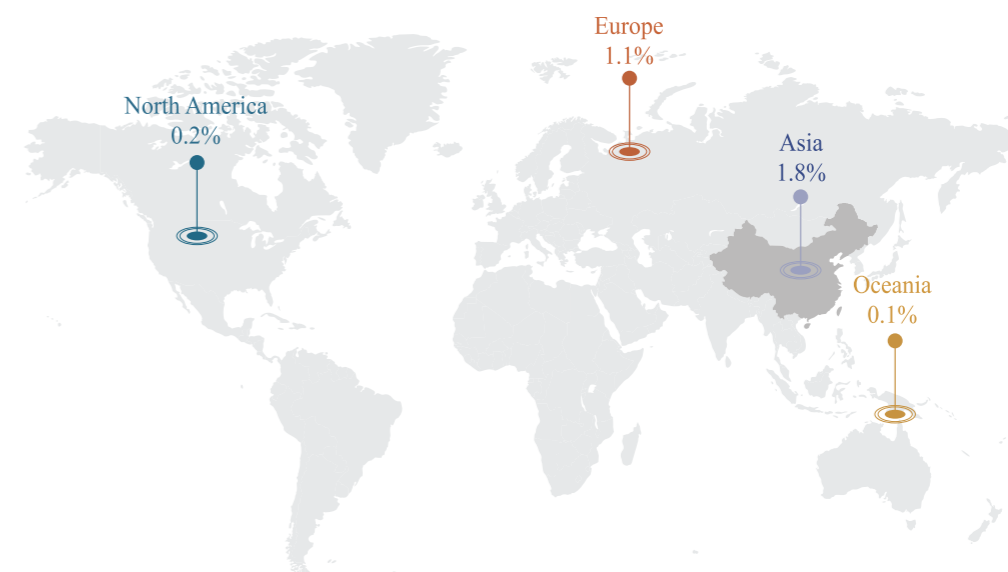

- Petrochemical equipment exhibition area
- Chemical unit equipment exhibition area
- Chemical environmental protection equipment exhibition area
- Pump valve pipeline exhibition area
- Automation and Instrumentation Exhibition Area
- Safety Protection and Emergency Fire Fighting Exhibition Area
- Smart Chemical Park Exhibition Area

Evaluation congratulations

▶▶ Tan Minjie, General Manager Shanghai Minjie Machinery Co., Ltd.

At this chemical equipment exhibition, our company grandly launched the new SDR high-efficiency energy-saving concentrator, which is mainly used for the evaporation and recovery of organic solvents in the chemical, pharmaceutical, and food industries. The company's products have been sold to more than 20 provinces and cities in China and exported to more than 0 countries abroad. We sincerely wish the 16th Shanghai International Chemical Environmental Protection Exhibition and the 16th Shanghai International Chemical Equipment Exhibition a complete success.

▶▶ Nantong Planet Graphite Co., Ltd.

Nantong Planet Graphite Co., Ltd. (stock code: 688633) has been rated as a national manufacturing single champion demonstration enterprise, the first batch of national specialized and innovative small giant enterprises, a national intellectual property demonstration enterprise, a high-tech enterprise, and a national Torch Program project implementation enterprise... I wish the 16th Shanghai International Chemical Technology and Equipment Expo CTEF2024 a complete success, and the exhibition will get better and better. Let us work together to create brilliance!

▶▶ Fujian Snowman Co., Ltd.

This exhibition is not only an opportunity to showcase the strength of enterprises, but also a platform to gather industry elites and exchange innovative ideas. In this exhibition, we will also discuss the future trends in the field of chemical equipment as an exhibitor with industry colleagues and share our latest technological achievements and application cases in the field of refrigeration and process compression equipment.

▶▶ Dalian Sulzer Pumps and Compressors Co., Ltd.

Sulzer Group was founded in 1834 and is headquartered in Winterthur, Switzerland. It is a global leader in the fields of pumps, chemical separation and mixing equipment, turbine services, and glue coating equipment. I wish the 16th Shanghai International Chemical Equipment Exhibition a complete success!

▶▶ Zhejiang Chang Cheng Mixing Equipment Co., Ltd.

Zhejiang Changcheng Mixing Equipment Co., Ltd. was established in 1993 with a registered capital of RMB 135 million, a land area of about 90,000 square meters, and more than 400 employees. As a professional exhibition in the industry, the 16th Shanghai International Chemical Equipment Fair is a great platform for us to display and trade. I wish CTEF will be better and better!

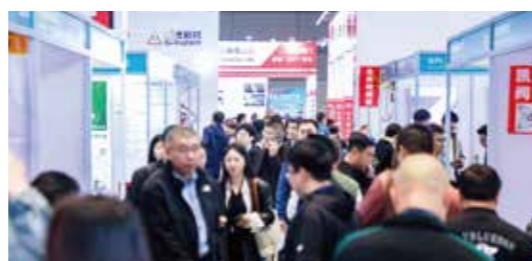

▶▶ Director Yin, R&D Department, Shanghai Huayui Paint Co., Ltd.

Affected by national policies, the production process requirements of coatings are getting higher and higher. We need to come to the exhibition to discover new technologies and equipment to improve production processes. Many first-class companies in the industry have appeared at this exhibition, providing us with a good communication platform. At the same time, we also thank the organizers for their attentive service, which allowed us to quickly find matching partners.

▶▶ Manager Zeng BASF New Materials Co., Ltd. Equipment Departm

As a leading global chemical company, we need many high-quality suppliers to meet our production needs. The exhibition happens to be the best platform for communication and cooperation. We met many excellent exhibitors at the expo and discussed future cooperation intentions with them.

▶▶ Mr. Li Researcher at Wanhua Chemical Group Co., Ltd.

Wanhua's development is inseparable from innovation. The International Chemical Equipment Expo brings together outstanding chemical companies at home and abroad. Here we can learn about the latest market trends and find the best partners. It also provides us with useful ideas and creativity for future development. I wish the exhibition will become bigger and better.

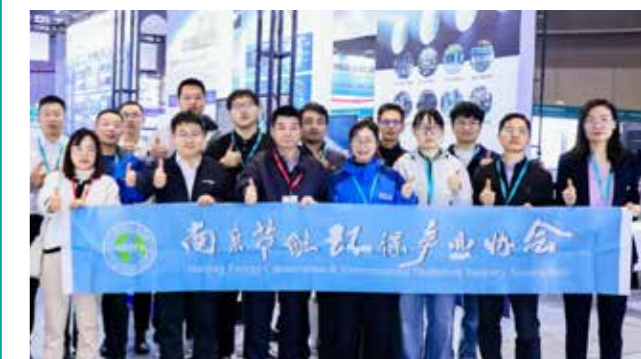

AUTHORITATIVE ASSOCIATION

FULL SUPPORT

Associations formed groups and merchants gathered

CTEF Zhenwei Chemical Equipment Exhibition has been established for more than ten years and has received strong support from domestic and foreign business associations. Shanghai International Chemical Equipment Expo is jointly sponsored by China Chemical Equipment Association, China Chemical Machinery Power Technology Association, Zhejiang Pump and Valve Industry Association, Wenzhou Longwan District Valve Industry Association, and Zhenwei International Exhibition Group. Among them, China Chemical Equipment Association is the only national association in my country's chemical equipment industry.

In addition, the exhibition has received attention and support from authoritative industry associations such as Shanghai Chemical Industry Association, Shanghai Paint and Dye Industry Association, Shanghai New Materials Association, Jiangsu Valve Industry Association, Jiangsu Petrochemical Equipment Industry Association, Hebei Pipeline Equipment Manufacturing Industry Association, Shandong Environmental Science Society, Shandong Daily Chemical Industry Association, Fujian Petroleum and Chemical Industry Association, Nanjing Energy Conservation and Environmental Protection Industry Association, Wenzhou Pipe Fittings Industry Association, Wenzhou Wanzhou Chamber of Commerce, Jingjiang Pump and Valve Industry Chamber of Commerce, Huizhou Petroleum and Chemical Industry Association, Jiaxing Port Area

PROFESSIONAL AUDIENCE IGNITE BUSINESS OPPORTUNITIES

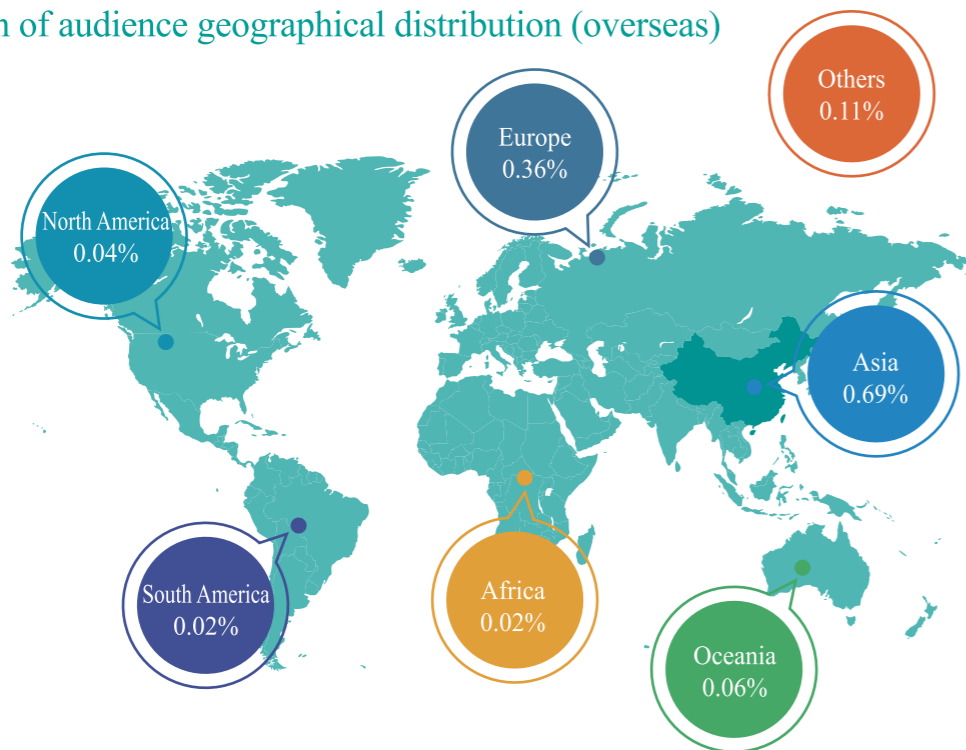

Professional Visitors

This exhibition attracted a total of 101,159 (a year-on-year increase of 13.6%) professional visitors from 36 countries and regions to visit and negotiate, becoming a "strong engine" to promote the high-quality development of the industry, opening up the extension chain of domestic and foreign trade exchanges, and helping to smooth the domestic and international dual circulation.

China Chemical Equipment Innovation and Development Conference

As a major forum event supporting CTEF2024, the China Chemical Equipment Innovation and Development Conference, with the theme of "AI empowers equipment manufacturing to be green and low-carbon, improve quality and increase efficiency", discusses and summarizes the development achievements of the deep integration of the chemical equipment industry with new-generation information technologies such as AI, big data, and 5G+, helping my country to accelerate the formation of new quality productivity of chemical equipment and promote my country's chemical industry to enter the fast lane of high-quality development. The conference was co-organized by the Shanghai New Materials Association and Zhenwei International Exhibition Group, and received strong support from the Shanghai Federation of Industrial Economics.

Forum on Promoting Exchange and Cooperation in the Chemical Industry Between China and Indonesia

CTEF is based on the background of the accelerated overseas expansion of excellent domestic chemical equipment companies, and further implements the development results of the previous CTEF International Online Exchange Conference and CTEF Global Tour (Indonesia Station), helping participating companies to accelerate the development of the Indonesian chemical market. A forum to promote exchanges and cooperation in the field of China-Indonesia chemical industry was held at the exhibition site. Mr. Berlianto Situngkir, Consul General of the Indonesian Consulate in Shanghai, led representatives of several leading Indonesian chemical companies to visit the site to gain an in-depth understanding of the innovative development results of digitalization, intelligence, and energy conservation of Chinese chemical equipment companies, establish strategic mutual trust, and innovate trade cooperation.

Micro-chemical Technology Forum and Micro-channel Equipment Development and Application Seminar

Microchemical technology, which aims at the "continuous, green and high-end" chemical process, is a new modern chemical technology that is urgently developed in the new era and has received widespread attention from all walks of life. From November 19th to 20th, the Microchemical Technology Forum and Microchannel Equipment Development and Application Seminar hosted by the Pharmaceutical Chemical Professional Committee of China Chemical Enterprise Management Association, School of Biological and Pharmaceutical Engineering of Nanjing University of Technology, School of Chemical Engineering of Hebei University of Technology, Anwei "Continuous Flow Technology, Zhenwei International Exhibition Group was held in the forum area of the exhibition

The 6th Chemical Wastewater Advanced Treatment and Resource Utilization Technology Seminar

In order to help the country achieve its pollution reduction and carbon reduction and clean production goals, and meet the requirements of oil and chemical companies to reduce pollution and carbon reduction and enhance efficiency, and transform to green and low-carbon development, on November 20, the 6th Chemical Wastewater Deep Treatment and Resource Utilization Technology Seminar was successfully held on site, hosted by the National Engineering Research Center for Efficient Utilization of Water Resources and Engineering Safety, and organized by Qingdao Adi Desalination Center and Guangzhou Zhenwei International Exhibition Co., Ltd.

Shanghai Chemical Industry Association 2024 Member Service Summary and Commendation Conference (Internal Meeting)

On November 20, the 2024 Member Service Summary and Commendation Conference of the Shanghai Chemical Industry Association was successfully held in the forum area of the exhibition site, with more than 100 association members attending the meeting. The meeting summarized the association's efforts to strengthen its service purpose, innovate service content, build an exchange platform, promote enterprise development, explore and highlight publicity highlights, and continue to write a new chapter in serving enterprises and serving the high-quality development of the economy and society. At the meeting, outstanding liaison officers, outstanding training organizers, outstanding correspondents, and outstanding workers in foreign trade bases of member units were commended.

I“International Purchasing Group Visits Chinese Enterprises”

On November 20, the CTEF organizing committee accompanied senior executives from leading Indonesian chemical companies such as OBM DRILCHEM Tbk and PT NINDYA KARYA to visit Shanghai Huayi New Materials Co., Ltd. and Dingjie Software Co., Ltd., and lively exchanges took place at the event.

INDUSTRY MEDIA DEPTH FOCUS

Special live broadcast, one-stop customization, enhance the brand value of exhibitors

The organizing committee provides exhibitors with one-stop customization, special live broadcasts, procurement matching, visits and inspections, new technology promotion and other ways to efficiently enhance the brand value of exhibitors and draw up a new blueprint for online marketing.

The invitation program for buyers from all over the world has lasted for 17 years

Since its establishment, the CTEF Organizing Committee has strengthened exchanges and cooperation with global partners. CTEF's footprint has gradually extended to four continents and five oceans around the world, and has been promoted in the United Kingdom, the United States, France, Italy, Canada, Greece, Spain, Germany, Switzerland, Sweden, the Netherlands, Indonesia, India, New Zealand, Singapore, Russia, South Korea, Japan, Brazil, Australia, Algeria, Uruguay, Kazakhstan and other regions, allowing CTEF to step onto the world chemical stage with a new look, and also allowing chemical workers from all over the world to learn about China's cutting-edge chemical equipment products and technologies through CTEF.
